

Controller CSS

With our line of controllers, our LHS hot air tools can be controlled accurately to the degree. Target and actual temperatures are continuously displayed.

Benefits

- Digital display of target and actual temperature, manual setting option for the target temperature
- Optimized for operation with the LHS SYSTEM air heaters
- Adjustable alarm thresholds
- Visible alarm or on a zero potential relay contact
- PID values set directly on the controller or via a PC interface (optional), auto tuning function

Why Buy From Us

The Controller CSS is available only through STANMECH and its distributor network. These compact controllers are designed specifically for machine installation.

Technical Data – Controller CSS

Voltage	V~	100 - 240
Consumption	VA	8
Frequency	Hz	50 / 60
Size (L)	mm	99
Size (W x H)	mm	45 x 45
Weight	g	160
