# **(B)** OPERATING INSTRUCTIONS

## LEISTER LABOR S Hot-Air Pistol

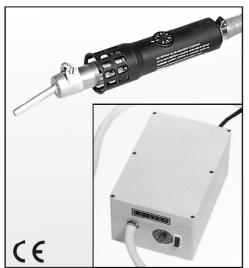

Read operating instructions carefully before use and keep it for further reference.

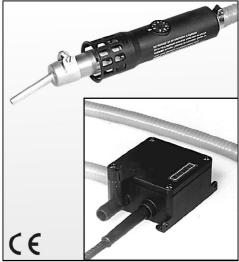

### **APPLICATION**

- The LEISTER Hot Air Pistol LABOR S are hand tools. The version mains connection box is also suitable for building into machines, installations and appliances and is designed for continuous operation.
- Soldering and de-soldering of SMD and thru-hole components.
- Welding of thermoplastic materials and also single-ply flexible plastics and modified bitumen in
  the form of boards, tubes, profiles, lining membranes, coated materials, films, foams, tiles and
  sheets. The following procedures are possible: overlap welding, welding with rod, with tape,
  tack welding and melt welding.
- Shrinking of heat shrink sleeves, films, tapes, solder sleeves and moulded parts.
- Activating/loosening solvent free adhesives and melt adhesives.
- Drying of water-damp surfaces.

### **UNINTENDED USE**

Any other use of the LABOR S or any use beyond the type of use described is deemed improper use.

Leister Technologies AG, Galileo-Strasse 10, CH-6056 Kägiswil/Schweiz

### WARNING

**Danger to life** when opening the tool, as live components and connections are exposed. Unplug the tool before opening it.

Incorrect use of hot air blowers can cause **fire and explosion hazard**, especially near combustible materials and explosive gases.

Do not touch the element housing and nozzle when they are hot as they can cause **burns**. Let the tool cool down. Do not point hot air flow in the direction of people or animals.

### **CAUTION**

The **voltage rating** stated on the tool must correspond to the line/mains voltage.

For personal protection on building sites we **strongly recommend** the tool be connected to a **GFCI** (**G**round **F**ault **C**ircuit **I**nterrupter) or a **RCCB** (**R**esidual **C**urrent **C**ircuit **B**reaker).

The tool must be operated **with supervision**. Warmth can reach combustible materials, which are out of sight.

Protect tool from damp and wet.

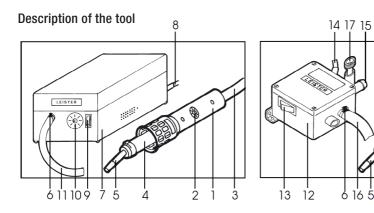

### APPROVAL MARKS

The device is **CCA** certified (**C**ENELEC **C**ertification **A**greement)

#### Pistol

- 1. Handle
- 2. Potentiometer for temperature adjustment
- 3. Air hose
- 4. Tapered element housing
- 5. Nozzle
- 6. ESD-lead connection stud

#### Version with blower box

- 7. Box for blower
- 8. Cable to mains
- 9. On/off switch
- 10. Potentiometer for air

flow adjustment

11. Air and power supply for pistol

### **Operating Condition**

- As required, push-fit appropriate **nozzle (5)**.
- Connect tool with ESD-Version at the ESD-lead connection stud (6) to ground.
- Connect tool to the mains.
- Switch on (9) air supply.
- The air flow is steplessly adjustable by use of the potentiometer (10). The hot air temperature is steplessly
- adjustable by use of the red potentiometer (2).
- Allow tool to warm up for about 5 minutes

### Version with mains connection box

- 12. Mains connection box
- 13. On/off switch
- 14. Cable to mains
- 15. Air connection (input)
- 16. Air and power supply for pistol
- 17. Air flow reduction screw

### **Operating Condition**

- Connect mains connection box (12) to the air supply. Use LEISTER blower or compressed air at reduced pressure.
- As required, push fit appropriate **nozzle** (5).
- The air flow is steplessly adjustable by use of the reduction screw (17).
- Connect tool with ESD-version at the ESD-lead connection stud (6) to ground.
- Connect tool to the mains.
- Switch on (13) tool.
- The hot air temperature is steplessly adjustable by use of red potentiometer (2).
- Allow tool to warm up for about 5 minutes.

### Operation

• The LEISTER Company, as well as the Service Centres, offer free training courses in all areas of application (see page 1).

### Change of nozzles

- Before changing nozzles, allow the tool to cool down, or use only combination pliers.
- Do not touch hot nozzle (5) and make sure to put it only on a heat resistant surface, because of the fire hazard.
- The nozzles are easily pushed onto the tapered **element housing (8)** and are then secured by fastening the screw on the clamp.
- Only LEISTER nozzles should be used.

### **ACCESSORIES**

• Use only LEISTER accessories.

### **MAINTENANCE**

• Clean the **welding nozzle (5)** with a wire brush.

### SERVICE AND REPAIRS

- The carbon brushes of the welding tools motor should be checked after about 700 hours running time by your Service Centre.
- Repairs should only be carried out by authorised LEISTER Service Centres. They guarantee a specialised and reliable **Repair Service within 24 hours** using original spare parts lists.

### **GUARANTEE AND LIABILITY**

- Guarantee and liability are in accordance with the guarantee certificate as well as with the currently valid general business and sales conditions.
- LEISTER Technologies AG rejects any guarantee claims for tools which are not in their original condition. The tools must never be altered or changed.

Technical data and specifications are subject to change without prior notice. Your authorised Service Centre is:
